... a moment you're proud of, a learning moment, an inspirational video, a mistake you made at work, or any part of life you want to share. You can watch it as a standalone loop, or share it in a playlist and let people add comments and even vote for favorites. We're adding more loops every day! Let's work together to create and share the best loops, and we'll work to keep them free of copyright. Thank you for being here! I'm delighted that you found us. ? I'll be happy to give you a new challenge! ? Hi Bill. Yeah, I know you have a full plate with the website, but we're about to close the doors on this site and move to a new site. Check back soon for the next challenge. Bill, there are several issues I have with the site... 1) You have an illegal-ish site with copyrighted footage of mine. (I didn't get a chance to look at the new site yet, but I'm pretty sure they don't have any and none of the old guys use the clips. And from your comments, it seems they don't use any for the new ones either.) You're already in a tight spot here, I don't want to make it any more tight. 2) You're taking money and not giving it to me. 3) You've killed the site and the challenge. It's been a good ride. I still have over 100 completed videos. But it was good while it lasted. 4) You're being a little uncooperative in the spirit of the open source community. You're not being clear about what you are, and what you're not, and that makes it difficult for others to collaborate. 5) You're part of a community of people that want to pay for content and make money. I'm not a lawyer, so I can't give you legal advice. But that's my thoughts on it. I love the challenge. But as you can see, I'm not looking forward to the idea of uploading a new project. Which is not to say I don't love the community. I do. But I do not love the idea of working for free. I would rather have a job, with the ability to make some money in the process. in the plane SV_x = 05 within the open 82157476af
